My name is Ishiaku Ada Fatima, born on December 25, 1975, in Kaduna state, Lagos Nigeria. I grew with a man that I thought was my dad, not knowing he wasn't my dad. I was sexually abused before the age of seven 'til I was fourteen years old. How I almost killed myself, how I lived on alcohol, how my mother treated me so badly. Now I'm using my story to help victims like me, to help them break their silence by speaking out and also to let the world know what sexually abused girls go through mostly in Nigeria and also to let people know that victims should not be bullied. I believe my book will help victims speak out and also open the eyes of society to see what victims go through that way people can help them and not bully them. Mothers in Africa believed victims should keep quiet because they see this act as a taboo while the victims die in silence. This book is about saving the girl child by breaking the silence.

To many who were born in the 1940s or before 1960 – the old generation – Balogun was the best footballer to have come from Nigeria. He was regarded as a total footballer who combined scheming skills with striking skills. He was seen as a footballer with sharp shooting, dribbling and heading skills.

On the international scene, he was one of the earliest Nigerian footballers to venture abroad and also trained as a coach. He is reported to be Africa's first qualified professional football coach. He was the assistant coach to the Nigerian team at the 1968 Olympic Games in Mexico. But as his star began to take an international dimension, he died suddenly in his sleep on 30 July 1972. This book recalls his exploits.

Each year, millions of women are raped or sexually abused but only a few out of them tell their stories. Some of them commit suicide because they believe their honor and dignity had been snatched away from them during the unwanted and shameful act often lasting only a few minutes. Research has shown that young female children and women are the prime targets of this crime. Many rape victims are still hurting from its shame till this moment while others have ended their lives because they were blamed for being raped. She Tells It All is about some aspects of my life while growing up, incidents which I have always felt the need to shout out to families, to other girls /daughters. By taking the bold step of writing this book and being a voice that can be heard, I hope that others as well can make a positive change in their lives by coming out with their stories knowing that it is never too late to take a bold step. Being raped or sexually molested is a traumatic experience which could bring one's life to an end. She Tells It All is an eye-opener to every reader that whoever goes through such an experience should not keep silent but dare to speak out for justice to take its course. The laws relating to the offence of rape has been explained in such a way that any reader can understand. The Race For Capital (And Other Out-Of-The-Box Economic Arguments) / Tope Fasua
Nigeria: Tope Fasua (Self-Published), 2015
324p.,
\$ 65.00 / HB
542gm.

The Race for Capital (And Other Out-of-the-Box Economic Arguments) is my third book and an aggregation of some of my most important economic and financial thoughts in recent times, as distilled from my weekly column and elsewhere. The book's title derives from the biggest economic argument of the day-the problem of inequality-which has finally been noticed by important economists around the world but to which no solution has yet been found. In this book, that argument is further advanced, and an African perspective is added, because whenever important economic arguments such as this goes on, that most vulnerable continent does not feature in the analysis. But the perspective of this book is not all about complaining about the state of Africa and its position development-wise but also on solutions. Some germane solutions are hereby offered for African economies especially, but these are also for every other economy around the world that seeks to reposition its people and make a dent in the hard-to-solve quagmires facing the world today. There are no simple solutions, apparently.

This book provides important aspects of African diasporic experiences, covering the mass movement of Africans to Asia, Europe, and the United States of America, the resistance to the epistemic violence caused by slavery and slave revolts, and the survival of African culture in the Diaspora. The book also explores the role of arts in fostering development as well as the influence of slavery and religion on Africans. Given the contradictions that continue to define African experiences in the global capitalist system, the book offers some alternative points of departure. Samuel Ojo Oloruntoba is a Senior Lecturer and the Coordinator of the Research cluster on Innovation and Developmental Regionalism at the Thabo Mbeki African Leadership Institute, University of South Africa, Pretoria, South Africa. In this book, we argued that although Nigeria is richly endowed with both human and natural resources, the country's success has been constrained over the decades by ethno-religious conflicts, political instability, corruption and misgovernance by its ruling elites and an almost dysfunctional economy; as a result of which a vast portion of its population lives in abject poverty. A detailed meta-narrative for anyone who genuinely desires to understand the history of Nigeria: the origins of its many ethnic nationalities, their economic activities, the nature and character of their socio-political institutions, patterns of group contact and interactions, encounters with aliens forces and the implications of these on their development, the people's struggles for independence and having achieved this, how they have continued to grapple with the challenges of nation building; the book would certainly find reading points across all classes and generations of Nigerians. The book is written in very simple and lucid English and is devoid of complex narratives and interpretations. It would easily and certainly find readership across all classes and generations of Nigerians.

'I wish I knew Yusufu Bala Usman better. His stuff is so good; the best kind of lucid, outspoken, demystifying, vigorous, witty, radical writing. Whom among radical pamphleteers does he remind me of? Tom Paine? William Morris? Jamal Al-Din Al Afghani? Ho Chi Minh? Franz Fanon? Something of all of them. He certainly belonged to that honourable and honest tradition. When I first met him, several years ago at Ahmadu Bello University, Zaria, I was impressed by the depth and range of

his historical understanding (he corrected some of my errors in regard to the history of Katsina, helpfully and politely). I did not then sufficiently realize that he was also a perceptive and critical Marxist, a splendid deflater of academic pomposities, a courageous opponent and analyst of the neo-colonial Nigerian state and its ruling class’.

In the 1990s, Nigeria experienced one of its darkest periods; the country's reputation in the League of Nations was at its lowest ebb and a wave of negative role models emerged. Against the backdrop of an increasing decay in the moral fabric, dishonest practices and inefficient management of public affairs by successive governments, Hallmarks of Labour Foundation [HLF] was conceived.

The need to document for the purpose of history, the work of Nigeria's greatest contributors has led to the birth of the Hallmarks of Labour Book Series, which is a reference material for researchers on the life and works of Nigerian contemporary role models. Each volume contains abridged biographies of three Hallmarks of Labour Award Recipients with emphasis on the major

contributions of each of the subject to National development. The first volume was published in 1999.

A feast for those who thrive on reading about violence, crime, cruelty and totally weird characters; it features a gang of violent criminals who terrorise the citizens of local villages. Allergic to work, they subsist on hanging around the local motor park, touting for tips and looking for opportunities to cause havoc; even going so far as to gate-crash a wedding, steal the guest's handbags and then break up the wedding ceremony, just for the hell of it. Nwadiibia, their leader, ugly as sin, shuffles along the street, constantly plotting ways of exacting revenge against his enemies or torturing the citizenry. There is a story about a young girl whose life takes a traumatic turn after being a victim of sexual assault; another about a community who are forced out of their homes on Christmas eve by a horde of blood thirsty, gun wielding assailants, and another about a widow who has to swear before an ancient shrine to prove her innocence in her husband's death. When her detractors start to fall ill shortly after, people begin to wonder, could it be justice of the gods or something more sinister at work?

This novel attempts to advocate justice, sincere love and enduring care for one another, so that the world will experience and enjoy unpatrolled peace, tranquility, growth and development especially as we work together and hope for the "new normal". It gives a setting of peace, communal conviviality and oneness reigning supreme in the village of Onuma where their age-old tradition of "Be your brother's keeper" was still practiced.

Behind the Walls is a 10-chapter fiction which boldly celebrates teachers and challenges the ridiculous ways in which teachers are being treated by some proprietors and parents. It magnifies the relevance of teachers to remove willful oversight and brings readers out of willful forgetfulness. The novella centers around Miss Beauty Ugochukwu (aka Miss Bee) who makes herself approachable and trustworthy. Students see her as a friend and teacher. Some of her colleagues become jealous and call her names such as Miss Over Syllabus and Miss Pythagoras but she is not discouraged. Notable is her encounter with Madam Olufola whose only son, out of six, always bullies girls in Miss Bee's class. The mother insults Miss Bee for punishing her son and attempts to slap Miss Bee. The school unjustly demonstrates that parents are indispensable while teachers are expendable. Miss Bee, however, is appreciated by many people.

Chimamanda brilliantly avoided a single story by showing that just as many parents and owners of schools do not appreciate great teachers, many people appreciate and love them. Miss Bee is concerned about academic and emotional wellness of her students and is able to solve domestic problems in the family of the Adifala's.

How many names does a woman bear? *A Woman Has Many Names* is a voice to women, and all others who care to listen. It is a finely-knitted thread of poems that focus on issues some women are too scared to share. The poems allay their fears by turning their reverberating sobs into reinvigorating songs while equally reassuring them of their innate abilities to triumph over travails. The poet deploys her craft in the service of humanity by celebrating and championing the cause of the downtrodden whose essence are perennially punctured. She also deftly navigates other issues such as nationhood, inept governance and the universal subjects of love, hope, persistence and self-worth. Every poem in this collection is a name thirsting for sunlight—an undying essence embodying beauty, courage and strength in ways that enliven our world. Ultimately, the poems present a broad range of answers to the question, does a woman have many names?

For example, the poet, JP Clark, was driven by the "place of love" to write "Ibadan".

In this collection, the poet uses simple diction to navigate deep and complicated human emotions. We see that in the poem, "Seeds of Love":

Emerging is an ode to every woman, letting her know that like the butterfly, she has the transformational magic (the will and strength) within her, to emerge from the cocoon of the darkest seasons of her life and become all she is truly meant to be.

Is the State still relevant for development in contemporary Africa? There have been several scholarly efforts geared toward understanding the role of the State in facilitating socio-economic development in Africa. While some see the State as a benevolent political authority which possesses the necessary mandate and responsibility to advance development, others see it as an

area for personal accumulation and rent sharing. Indeed, there have been mixed results on the activities of the State and economic development in Africa over the past five decades of gaining political independence. This book contributes to the debates on the domestic and external forces that have continued to shape the role of the State in fostering socio-economic and political development in post-independent Africa. Contributors to this volume went beyond diagnosis of the challenges facing the continent to proffering solution and charting alternative strategies for achieving inclusive development.

This book provides insightful analyses from multi-disciplinary perspectives on the nature of the state and development in Africa. It covers an array of topics such as Pan Africanism, Governance, Inter Governmental Institutions, Regional Integration, the African Diaspora, Leadership and Peacebuilding, seeking to not only highlight the problems facing the continent but also to challenge the dominant western lenses through which they have been interpreted. It showcases the thinking of African scholars and charts a new development agenda for Africa. It makes a useful contribution to the debates on state and development in Africa.

The first four months of the year 2015 will be remembered by many as some of the most apprehensive days ever in the history of Nigeria. The destiny of Nigeria was hanging in the balance. In the centre of this political theatre were two personalities with significantly different trajectories: one, the incumbent president, Goodluck Ebele Jonathan of the People's Democratic Party (PDP) who had enjoyed an unprecedented, almost meteoric rise, to the apex of political power, and the other, then General Muhammadu Buhari of the All Progressives Congress (APC). *Buhari: The Making of a President* is a story of intrigues, suspense, betrayals, reconciliations, collaborations and strategic concessions, one which only an insider could have told to such detail.

The real basis of the manipulation of religion in Nigeria today is the need to obscure from the people of Nigeria a fundamental aspect of our reality: that is the domination of our political economy by a class of intermediaries who are being increasingly exposed. And this is to enable this class to cover themselves with religious and ethnic disguises in order to further entrench division among our people, slow down their awakening, at any cost; even the unity of our country, for which so much has been sacrificed. – Yusufu Bala Usman, 1987, The Manipulation of Religion in Nigeria 1977-1987.

With various objectives in mind, this book examines the cumulative scholarship of Professor Ogbu Kalu (1942-2009). The first objective is to supply the contexts to understand him at various levels. Including the scholarship to which he responded, the cultural background which his work was grounded, and above all, the debates that raged during his era. The second objective is to analyze the overall contents of his body of work that constitute his contributions to knowledge. The third is to go beyond his work and, in the process, make far-reaching reflections on Christianity as a religion and as a field of scholarship. The fourth and final objective is to create an agenda for the Center that is named after him.

With the changing dynamics of Christianity in an African context, it is important to recall Church History. There's much we can learn from the long history of Christian Faith. However, it appears we are living in a time where we are more ignorant of Church History than at any other point since the 16th-century reformation.

This book brings its reader up to speed with Nigerian Pentecostal History. This book endeavors to answer some important questions: How has the belief of a handful of persecuted and frightened people in Jerusalem over two thousand years ago expanded into a worldwide faith, stronger today than ever before? How did Nigerian Pentecostalism, a powerful force of Global Pentecostalism, begin? How did Assemblies of God, the world's largest Pentecostal denomination start in Nigeria?

What are the fresh, spiritual, and thought-provoking insights about one of its two core native leaders, Udom Akpan?.

Pelisa has written a book which celebrates the resilience of women; her own life is a testimony to that resilience. She pursues what sets her mind on relentlessly and the book conveys that.

In writing this captivating and thought-provoking book, Pelisa unapologetically states her feminist stance and would not tolerate any male-engineered repression of women's ambition. She points out the tragedy of accepting underachieving men as leaders which she says fosters male entitlement to positions of influence. Pelisa also makes it clear in 'Right To Be A Woman' that she is not on a crusade to discredit men and indeed in her book she gives men due recognition where it is deserved.

A lot has changed for women since the struggles for feminism and gender equality started. So much has been achieved and defined. Women want social harmony and a future encompassing both women and men: a future for their sons and daughters. I spoke to dozens of women during the course of writing 'Is The Future Female?' and none wants a world without men; to them it is unthinkable.

There is a present urgency to empower women and girls. I believe that this is commendable. However, the momentum should not further polarize gender relationships. Jamie Farnsworth Finn in his article published in TODAY, asked a very apt question: "how do we support our girls, without alienating our boys?"
