Beautiful Taiwan : Folk Beliefs in Taiwan / Huan-Yue Liu
Taipei : Government Information Office, 2001
61 p.; ill.; 23cm
957-02-6117-x
\$ 5.00

[Agricultural customs, festivals, respect for gods, fear of ghosts, and seasonal adjustments are primary contributors to Taiwan's folk beliefs. Certain unique indigenous activities, which have been passed down through the generations for several hundred years, are now celebrated in annual carnivals.

Most folk beliefs take the form and substance of polytheistic worship, a practice found among peoples in many parts of the world.

Although folk beliefs involve religion, they lack religious hierarchies, sacred classics and scriptures, and sophisticated rituals. Without the rigidity of organized religion, the practice of folk beliefs demonstrates a greater degree of liveliness, autonomy, and imagination, satisfying the spiritual of believers.]

Ethnicity in Taiwan : Social, Historical, and Cultural Perspectives / Edited by Chen Chung-min

Second edition

Taipei : Institute of Ethnology, Academia Sinica, c1999

ix, 192 p.; 23cm.

Includes Index

2. Mental Health

3. Ethnic Relations

\$ 10.00

[This book is the product of many years of effort the author invested in the fields of psychological anthropology and Taiwan aborigine studies. It is the first book published in English regarding issues of modern adaptation among Taiwan aborigines.

Hsu focuses on three adaptive problems: Mental health, mutual ethnic relations between two ethnic minorities and majority Han Chinese, and forms of socially deviant behavior manifested in daily life and specific situations such as the workplace. The theoretical goal of this study is to identify factors that determine coping strategies as ethnic minorities adapt to Taiwan society.

Hsu's evidence illustrates that economic poverty itself is not the sole demanding external challenge confronting an ethnic group. Hsu's book demonstrates the significance of psychosocial support provided by family members, kin groups, and community for persons in pain. Tremendous a differences between Atayal and Ami

societies in the creation of the self, plus manifestations of psychosocial reactions, verify a relationship between culture and psychosocial adaptation.]

Ethnography in China Today : A Critical Assessment of Methods and Results / Edited by Daniel L. Overmyer
 Taiwan : Yuan-Liou Publishing Co., Ltd., c2002
 382 p.; 23cm
 \$ 25.00

[This book includes twenty chapters reviewing a total of sixty-four books in Chinese in the two series: "Studies in Chinese Ritual, Theatre and Folklore" and "Traditional Hakka Society," edited respectively by Wang Chi'iu-kue and John Lagerwey. It is intended to inform the wider world of scholarship of this new research, which provides the most detailed information ever available about Chinese local culture, drama and religion. Together with the excellent studies of this dimension of culture by scholars in Taiwan, and with a revived interest in this area by other china mainland scholars, this book represents a resumption of the folklore studies

movement of the 1920s and 1930s that was interrupted by the war with Japan. These new reports may also be seen as a complement to the work of anthropologists, who until recently have not been able to conduct many field studies in China. As such, this research provides fresh information for an understanding of the culture of the majority of the Chinese people, an understanding based on their lived experiences and values]

The Struggle for Renaissance : Taiwan's Indigenous Culture (1)

The Range of Interpretation / Wolfgang Iser

Taipei : Institute of European and American Studies, Academia Sinica, c 2000

xvi, 266 p.; 23cm

Includes Index

957-671-707-8

\$ 11.20

[At the Invitation of the institute of European and American Studies, Academia Sinica, Republic of China, Professor Iser visited Taiwan in 1994. During his stay in Taiwan, he served as a distinguished Chair Professor of the National Science Council and gave a series of Lectures entitled "Variables of Interpretation: Iterations of Translatability." This volume is a revised and expanded version of these lectures, to which several chapters and an interview have been added. In this "anatomy of interpretation," Prof. Iser demonstrates the nature and function of interpretation and its relationship to human beings.

Chapter 1 surveys the marketplace of interpretation and spotlights the main trends and different genres of interpretation. It also points out what these different genres have in common-namely, they are all act of translation that transpose something into something else. Chapter 2 focuses on interpretation of canonical texts, such as the rabbinical exegesis of the torah or Samuel Johnson's reading pf Shakespeare. Chapter 3. discusses the rise and development of modern hermeneutics via the concept of the "hermeneutic circle." Chapter 4 examines the interpretative procedure in both ethnographic discourse and systems theory wherein the subject matter to be interpreted is neither textual nor scripted. Chapter 5 moves one step further by inspecting a genre of interpretation when incommensurabilites, such as God, have to

be translated into cognition. Chapter 6, which is an epilogue, sums up the discussion of the individual paradigms of interpretation and relates our interest in interpretation to our anthropological makeup. The appendixes contain two essays that further elucidate the performative quality of interpretation and an interview which both elaborates on Professor Iser's ideas and demonstrates the evolution of his theory.]

 Building Taiwan The Beautiful / Edited by Dialogue Magazine
 Taiwan : Council for Cultural Affairs Executive Yuan,c2003
 237 p.; ill.; 25cm
 957-01-4499-8
 \$ 65.00

This book serves as one of the starting points to manifest aspirations of Taiwan's culture and contains 84 pieces of outstanding, hundred year-old architecture recommended and selected by experts, classified into detailed biography, precious old photos, designer and site. Also, the rapid progression along the hundred year timeline shows that Taiwan's architecture had witnessed accelerated development. This book takes 'Before 1900', '1901-1950', '1951-1970', '1971-1985', 1986-1995, and 1996-to date` as segments of time.

For each time segment, invited senior architecture observers as representatives of that time period have introduced and provided richly varied historical viewpoints to piece by piece record the development path of society and culture, capturing the relationship between man and architecture and to guide readers into the space and time of architectural appreciation.

[In the winter of 1696, the Imperial Chinese gunpowder stores at Fuzhou exploded. Having heard that China's newly acquired land, Taiwan, was rich in the sulfur needed to replace the destroyed gun-powder, officials dispatched an adventurous literati, Yu Yonghe, across the Taiwan Strait to extract the mineral.

Based on Yu's diaries, Out of China, is a portrait of seventeenth-century Taiwan and its early relations with China. It is at once an adventure tale and a unique history of the period which gave birth to modern Taiwan.]

Iv, 315 p.; ill.; 23cm
957-938-191-6
\$ 20.00

[“The Dominicans restored their missionary work in 1859 in Takao and went up north
in 1886. They left behind a lot of first-hand information on the events that unfolded
in their surroundings, which is valuable considering the fact that only very few
foreigners were living in the island at that time. Such information is mainly
concerned about the difficulties the missionaries went through communicating with
the Chinese and Japanese authorities, about their dealings with the aborigines, the
coming of the Japanese and the Americans, the impact of the earthquakes, etc.
Most of this documentation is composed of the letters they wrote their superiors in
Manila, written in a straightforward manner, that indirectly gives more credibility to
their content.
This book contains illustrations which can be useful comprehension of Taiwan’s
history of religious art. Despite its objective value, however, Fr. Fernandez’s work
remains hardly known in Taiwan.”]

Includes Bibliography and Index
957-638-589-X
\$ 80.00

[The two volumes of this book represent the most comprehensive work to be done
on existing Spanish documentation about Taiwan.
“In comparison with the Dutch sources, the Spanish materials are not very well
exploited. Although its scope and amount cannot be compared with the Dutch, they
can afford reliable information on the history of the northern part of the island of that

time. Until now, only fragmentary records have appeared in some books. But if scholars have to rely only on these materials, they cannot satisfy the need for further studies. This book of Professor Borao fills up this gap in the most exhaustive way possible.]

Monographs on American History – 1

\$ 18.00

[Historians and the Abolition Movement is a study of the major changes in the interpretation of the abolition movement from the last decade of the nineteenth century when trained historians first came to write about it, down to the nineteen-sixties. During these eighty years, the historical treatment of the ante-bellum crusade against slavery changed from partial approval to total denunciation, and then to sympathetic reappraisal.

In the analysis of these changes, the author also tries to locate the factors contributing to such shifts in interpretation and attitude. He finds that the accumulation of scholarship and material, and the historian's background and convictions were influential. However, greater emphasis is put on the relationships between the historian's view of the abolitionists and the general outlook of his age, because, during given periods, abolition historians often agreed on a general pattern in their attitudes and interpretations of the abolition movement.]

Diacritics in Early Tayal Manuals / Fredric Francis Weingartner

Taipei : Taipei Ricci Institute, c2002

vi, 265 p.; 23cm

Varietes Sinologiques New Series : 92

957-9390-38-X

\$ 12.00

[This book examines a set of manuals devoted to the teaching of the Tayal language, the Tayals being one of the main Aboriginal groups of Taiwan. Analyzing in a systematic way the sound charts and glossaries that this set of manuals offers, Frederic Weingartner allows the reader to better grasp the differences noted from one Tayal dialect to another as well as the development of pedagogy in the teaching of aboriginal languages.

The author brings to attention the most important role played by diacritics. Diacritics are tiny signs occupying writing spaces and palying different functions: phonological, morphological and syntactic. For instance, in one of the sound charts of Tayal language, a specific sound is represented by a sign borrowed from Chinese writing, it has no specific name and is describes as silent. A diacritic aside of it gives it a name and transforms it into a vowel of Tayal, the quality of which will be indicated with an additional diacritics.

None of the mauals here reviewed has attempted to formulate syntactic rules. That may have to do with the role played by diacritics, namely to become dispensable once the goal of the manual is reached.

This book will be most helpful to people interested in the teaching of aboriginal languages, phonology, lexicology and Taiwan studies.]

Literature

General Yue Fei / Qian Cai, Translated by T.L.Yang

Hong Kong : Joint Publishing (Hong Kong) Co., Ltd., c1995

961 p.; ill.; 24cm

962-04-1279-6

\$ 35.00

[General Yue Fei has been a household name all over China for nearly nine Centuries. His defeat of the Jin Tartars, a nomad people from today's Manchuria, earned him everlasting fame. He was born into a poor family in Tang Yin County, Henan Province. He joined the army in the second half of the Reign of Emperor Huei Zhang (1101-1125). Having succeeded several times in his campaigns against the Jin invaders, Yue Fei finally reached the Town of Zhuxian(near today's Kaifeng City in Northern Henan Province). He was about to cross the Yellow River and make a

decisive assault on the Jin Capital (called the Yellow Dragon City) when he was urgently summoned back to the Chinese Capital. In order to secure peace, the Prime Minister Qin Kuai was prepared to cede all the territories north of the Huai River to the Tartars. So impatient was he for Yue Fei's withdrawal from the front that he dispatched twelve decrees in the name of the Emperor in the course of a single day. When Yue Fei arrived at the Capital, Qin Kuai immediately had him arrested and incarcerated on a false charge of treason. Two months passed and there was no evidence against Yue Fei. Qin Kuai then handed his secret instructions to the prison Guard. The next day Yue Fei was found dead. He was then only thirty-nine. Qin Kuai's crimes were eventually exposed. Emperor Xiao Zhong (1163-1189) bestowed posthumous honours on Yue Fei, who has been loved and respected by people of the whole country as a national hero ever since. This book was written by Qian Cai, a scholar in the Reign of Emperor Kangxi (1664 - 1721). The translation was made by T.L.Yang, now Chief Justice of Hong Kong.]

Two Journeys to the North : A Comparative Study of the Poetic Journals of Wen T'ien - hsiang and Wu Mei-ts'un / Tung Yuan - Fang

Taipei : Bookman Books Ltd., c2000

175 p.; 24cm

Includes Bibliography

957-586-850-1

\$ 20.00

[This book focuses on two Chinese poets' journeys to the North : Wen T'ien-hsiang (1236-83) and Wu Mei-Ts'un (1609-71). Although more than three hundred years apart, they encountered similar situations: their homeland besieged and falling into foreign hands. As intellectuals, they felt obliged to respond to changes resulting from a crisis. Wen, the captive, journeys north to certain death. These poems function as a means through which he can express his willingness to achieve his moral goals, no matter what the cost. They sharply contrast with those of Wu, on his way to take up a government post. His verse demonstrates a restless mind facing the dilemma of what he should do and what he can do. From different points in history and purpose, both poets herein converge to be celebrated for their notable contribution to the cannon of Chinese poetry.]

 Performing Arts

Taiwanese Opera [Beautiful Taiwan] / Ho-Yi Lin

Taiwan : Government Information Office, 2001

60 p.; ill.; 23cm

957-02-6120-x
\$ 5.00

[Taiwanese Opera originated from the style of folk song called "chin ke," popular in southern Fujian Province. It later evolved into a theatrical art form in Taiwan, thus incorporating the character and customs of Taiwan.

In traditional Taiwanese society, outdoor performances of Taiwanese opera were important events at temple festivals or during celebrations. Today's indoor theater performances remain popular for many people, for the folk stories provide a pleasurable break from the tedium of daily life. The situations seen in Taiwanese opera also vividly reflect the experiences and thoughts of people in the real world.

As Society becomes increasingly modern, Taiwanese opera is gradually vanishing from Taiwan's Countryside. Thanks to research conducted by enthusiastic scholars and new performing troupes, Taiwanese opera is now being presented in modern theaters and on the international stage.]
