[Among the chief economic policy-makers, K.T. Li was the most influential in Taiwan during the second half of the twentieth century. He served in important positions and guided industrial development, economic and financial policies, tax reform and development of human resources, all of which are determinants of Taiwan's dramatic economic growth. This book is built upon a detailed oral history by K.T. Li himself, and supported by further archival research and other interviews. Readers will better understand K.T. Li as well as the process of economic policy-making in Taiwan from 1953 to 1988.]

[Democracy is a fragile flower often watered by the blood of its adherents; however one it has taken firm roots in can withstand the strongest gales. The flags of six separate nations have flown over Taiwan as it struggled for independence and democracy. In the twentieth century, Taiwan went from Japanese colonialism to the White terror and domination of the one-party state rule of the Chinese nationalist party (KMT). In 1996, the people of Taiwan finally won the right to freely and directly elect their own president. For this flower of democracy to survive, it will take the efforts and vigilance of all the people of Taiwan but in particular its Strawberry generation.]
