[The Guide to Xanthos and Letoon, written by the archaeologist excavating at the sites, has been prepared for the exhibition "Xanthos, Architecture of a Civilization". The book covers the history of Lykia as well as presenting for the first time a complete evaluation of the excavations of both sites and is designed to facilitate visiting. The city of Xanthos sets an example for an indigenous Anatolian city with its characteristic trends of a local civilization that evolved progressively according to first Greco-roman and then Byzantine model: the site was first inhabited in the 7th century BCE through 7th. in fact 11th century CE. Based on the quality of the edifices extant, and the abundance of official inscriptions the Sanctuary of Letoon seems also to have a similar development and played the role of federal sanctuary of the Lykians.]

The world of the Alevis : Issues of culture and Identity [Including a comparison of the Anatolian Alevi Ocak with the North Indian Gharana] / Gloria L. Clarke
Istanbul : AVC Publications, c1999
viii, 188 p.; 23cm.

Includes Bibliography and Index.
975-7317-09-8
\$ 30.00

[This studies provides an in-depth look at the historic and contemporary issues of culture and identity grappled with by the Alevi People of Turkey. Since 1990, they have been openly exploring these issues and seeking new paradigms to fit ancient beliefs to the modern world. This study examines the role of the dede, spiritual leader and primary culture bearer. Since research on the north Indian gharana is more available in ethnomusicological literature, the parallels between the Ocak, a dynasty of faith carriers, and the gharana, a dynasty of culture carriers, were used to establish a method of observation.]

Hierapolis of Phrygia (Pamukkale) : An Archaeological Guide / Francesco D'Andria
Istanbul : Ege Yayinlari, c2003
240p. ; ill. ; 21cm.
Series Ancient Cities of Anatolia : 5
975-807-069-x
\$ 20.00

[The guide to Hierapolis in Phrygia (Pamukkale) is intended as an introduction to the city and its Hellenistic and Roman monuments for the general public. The Italian Archaeological Mission, in close collaboration with the Turkish authorities, has been developing a substantial programme of excavation and conservations since 1957. Hierapolis is characterised by the largest cemetery in Asia Minor, with innumerable sarcophagi, funerary chapels and large barrows or tumuli. The hot water springs created the natural travertine basins that favoured the construction of large Roman baths. The religious centre of the city was the Sanctuary of Apollo, renowned for its alphabetic oracle, which rose above the cave of the Plutonion, one of the entrances to the underworld,. In Christian times, the city was the centre of pilgrimage to the tomb of the Apostle Philip, martyred at Hierapolis. A monumental octagonal building, sited on the hill dominating the city, was erected in his honour.]

Converted Byzantine Churches in Istanbul : Their Transformation into mosques and Masjids / Suleyman Kirimtayif

Istanbul : Ege Yayinlari, c2001

139 p.; ill.; 23cm.

Includes Bibliography and Index.

975-807-046-0
\$ 30.00

[After the conquest of Istanbul, a number of Byzantine churches were transformed into mosques. Because St. Sophia was the grandest of them all, by tradition it became the Great Mosque of Istanbul. Others were adapted to serve as the mosques of various educational centres. In this early period of transformation, those who had made names as commanders in the conquest played a leading role in the conversion of the Byzantine sanctuaries into mosques and masjids. These veterans, who were entrusted with the responsibility for rebuilding the city, would either have a masjid erected as the focus of the new neighbourhood they were establishing, or transform – if one existed – a Byzantine sanctuary already standing to serve the same purpose. Intensive transformation by Byzantine structures into mosques occurred especially during the reign of Mehmed II, and the tradition was continued by the viziers and grand viziers of Bayezid II. As the establishment of the new Mahalles (Neighbourhoods) slowed with the passing of time, the need for transforming Byzantine architecture also decreased, reaching a halt in the seventeenth century. From an architectural point of view, the alterations to the converted structures were relatively insignificant save for the construction of minarets and the addition of mihrabs. Repair and consolidation of the buildings focused mainly on minor architectural elements such as walls, doors, windows and columns.]

[Art and Armenian Propaganda using the film Ararat as a case study examines the role of the 'art' in propaganda activities and international politics. The book also provides a detailed analysis of the Armenian Propaganda network and its impact on Turkish – Armenian relations.

The book is divided into two separate parts : In part 1 the motives behind the Armenian Propaganda network is focused, then the film Ararat is examined. Part I provides an international relations perspective. Part II is devoted to the historical dimension : The book questions the film Ararat's allegations by looking at the archival documents in this part. Finally, the authors concentrate on possible solutions.]

The second largest ottoman city in the European part of the Empire, Salonica was a vibrant city where Muslims, Christians, and Jews lived and worked together. Like the city, the local branch of the Ottoman bank reflected the cosmopolitan atmosphere of the Empire. Based on data from the Ottoman Bank's personnel archives from the Salonica branch, Karatzoglou has pieced together

profiles of the employees, their positions, and their experiences in the bank. He produces the flavor of a local society on the eve of momentous change.]

[The study of clothes and dressing has great potential for social and cultural history. Typically Ottoman urbanites situated their fellow men after a glance at the clothing worn by the latter. As to the women, such conclusions were more difficult to draw, as all females were to be modestly covered up and ideally almost invisible. Yet in practice, at least from the eighteenth century onwards, it was often possible, at least in Istanbul, to distinguish fashionable from soberly pious women. To be aware of people's modes of dressing thus was part of knowing one's way around the Ottoman society.]

[This work examines the manner in which the Ottomans established control, in the fourteenth and fifteenth century, over a largely orthodox Christian population in the Balkans and Aegean basin. It argues that their success in ruling the multi-ethnic, multi-confessional state thus created was due less to force of numbers than it was to their granting a wide variety of concessions and privileges to their subjects. This book provides the reader a fascinating behind the scenes glimpse into how the early Ottomans managed to create a world empire primarily among peoples whose languages, religions and cultures were all equally foreign to them.]

[Levni's pictorial narrative of the Surname-I Vehbi, poet Vehbi's account of the festival organized in 1720 to commemorate the circumcision of four sons of Sultan Ahmed III, is undoubtedly one of the masterpieces of Ottoman art and possibly the last great example of illustrated Islamic manuscript. Preserved in the Topkapi Palace Museum in Istanbul, the work is illustrated with 137 paintings that re-create the personages, settings, and events of an extraordinarily lively and enchanting age known as the Tulip Period.

This period, datable to the first quarter of the eighteenth century, is renowned for its pleasure-loving social life and vibrant cultural activities with the court and the population of Istanbul enjoying endless nights in the waterside pavilions lining the shores of the Bosphorus and the Golden Horn, entertained by poets, musicians, and dancers. Above all, it was a period of technical innovation and modernization that came to be known as the second classical age of Ottoman art and culture. Levni's Surname not only records the history of this period but is also a part of that history.]

[Turkish Baths: A Light onto a Tradition and Culture is the first book of its kind. It represents an attempt to cast a much-needed light onto a fascinating Turkish tradition and culture that is deeply rooted in the history of Anatolia.

This book is a readable jaunt through the historic Turkish bath, its history, its traditions, and its culture. It also provides information about the kinds of items used in the past and those used today at the baths, the kinds of services offered, what the bather can expect, and what is expected of the bather. Finally, the book gives a complete guide to 50 of the still operating 57 historic baths of Istanbul. The book is fun to read as it gives highly interesting anecdotal information as well. Which famous pascha worked as a royal back scrubber when he was a lad? What about sex in the baths? And what about those lusty poems written by male bathers for those oh-so-sweet lads who scrubbed them in the private cubicles?

There are all kinds of new bathing facilities in Istanbul: hotel baths, pay-for-shower places, saunas and the like, but this book ignores these modern facilities. This is a book about, and a guide to, Turkish baths in Istanbul. It's a good read for those looking for the perfect bath and for those who want to understand what the Turkish bath tradition is all about.]

[This book is the pioneer scholarly work in English on the history of Japanese-Turkish relations between 1868 and 1945. Based upon original primary source documentation and introducing new perspectives, the subject offers the opportunity of tracing the history of nationalism in terms of Japanese Asianism and Pan-Turkist, Pan-Islamist currents as well as the Kemalist agenda of the new secular Turkish Republic. Topics include the exciting stories of political actors from the Turkish Republic. Topics include the exciting stories of political actors from the Turkish intellectuals, diplomats, intelligence agents, and merchants roamed across Eurasia from Istanbul through Central Asia. Many were adventurers, crossing cultural and political borders, participating in the tumultuous events surrounding the rise of Japan, the fall of the Romanov and Ottoman empires, and the establishment of the Republic of Turkey.

The authors focus on the history of Japan's connections with the "Turkish Crescent" as a global geo-political-economic strategy vis-à-vis Russia and Britain and as an entry into the world of Islam. Simultaneously, this is the history of Japan as the "Rising Sun" in the eyes of Turks, Tatars, Indians and others of the revolutionary and reformist movements in anti-colonial struggles within the Islamic world at the turn of the twentieth century. They juxtaposed Japan's experience as an alternative model to the modernity of the Western empires.

Scholars from Japan and Turkey have had a significant hand in the preparation of this volume which is published on the occasion of the Year of Turkey 2003 in Japan.

Thirteen experts offer fresh insight into a rich array of topics ranging from Japan's international relations with Turkey, Russia, Britain, and Germany to the comparison of Japan and Turkey in municipal reforms and the current global economic crisis.]

[This is the story of a handful of gallant aviators who fought bravely in the Dardanelles Campaign. Eleven years had passed since the Wright Brothers invention of the first flying machine on December 17th, 1903, and everything about it was in an experimental stage. So the air service still had to prove itself. Pilots and their hard working air mechanics and ground crewmen were exemplars of courage and endurance. The skillful and fearless pilots have written an air history with many firsts and turning points with their imperfect aeroplanes in the boundless sky. They accomplished impossible missions despite all difficulties and harsh conditions. It was a new brand of courage. They illustrated the importance of aviation which will continue to exist for centuries to come.]

[Avraham Firkowicz was a Turkic-speaking Karaite Jew from what is now Western Ukraine, who spent much of his life in extensive travels, during which he obsessively looked for ancient Jewish manuscripts. The academic world owes to this picturesque

man three most important collections of Jewish manuscripts ever collected by a single man. During his short stay in Istanbul in the Tanzimat Period produced there several important Karaite books in Turkish, and his activities in the Ottoman capital paved, in many senses, the way for far-going transformation of Karaite life there and in Russia, which ultimately helped rise of Turkic nationalism.]

[The Oriental belly dance is an unequalled exhibition which tells the story of men's birth. The Oriental belly dance is the rhythmic expression of the female capacity to give birth and her desire for sexual intercourse. In other words, it is the feminine expression of the human being's basic instinct to perpetuate his race. This universal feeling is the reason why belly dancing is globally accepted, appreciated and applauded.

The "belly Jerk" routine, from which the dance derives its name, a rendition of a fetus kicking its mother's belly and symbolizes pregnancy. This dance, which was born on Anatolian soil some 8,000 years ago, is nothing but a demonstration of the happiness felt at the emergence of a new life. Belly dancing is generally accepted to be the sensuous exposition of the female's instinct to seduce the male and is, in this sense, a sacred call.

The oriental belly dance is the most powerful aphrodisiac humanity has ever discovered and cherished...]

[During the last decade there has been a remarkable increase in the number of NGOs working on issues of building peace, women, environment, history education, cooperation of local governments and business associations, both in Greece and Turkey. The aim of this book is to bring more visibility to NGOs and provide a deeper understanding of the background of the new forms of civic dialogue taking place between the two countries. Writers from Turkey, Greece, UK, and North and South of Cyprus contributed to this publication to answer three questions : 1)What do you think are the most important developments in Turkish and Greek relations at the level of civil society during the last 10 years? 2) How would you evaluate these developments from the perspective of the field of your work? 3) What are your proposals for the future? Each author responded to the questions from his/her own experience.

By sharing experiences through the accounts and articles of key people dedicated to improve Turkish – Greek civic dialogue, we hope to raise public awareness – local and international – and strengthen our networks.]

[This book has emerged from a desire to provide the reader with a reliable source of information.
Its principal objective is to shed light on the single most consequential chapter in the political life of the island: the 1963-64 period.
The turbulence during this period did bring about dramatic changes in the lives of thousands.

The wave of terrorism and savagery brought an abrupt end to the bi-communal partnership Republic of Cyprus established in 1960, as a result of the usurpation of governmental authority by force of arms by the Greek Cypriot wing of the State. The reluctance of the Greek Cypriots during the first three years of the Republic to implement the provisions of the Constitution, and to respect the rights provided by international agreements to the Turkish Cypriot partner thereunder, had cast a dark shadow over the 1960 experiment which had aroused so much initial hope and expectation at home and abroad. The reader will find out how the Greek Cypriots, succeeded in transforming the island into line, short of declaring Enosis, in defiance of a generally disturbed world public opinion and in total disregard of often silent diplomatic representations by western countries.]

[The first three chapters of this book tends to reveal Rumi's life, environment, works and thoughts from some fresh and new angles. The rest of the chapters cover Rumi's best verses selected from his magnum opus the Masnevi (in six volumes). The verses are quoted in original Persian text along with their literal English translations and syntheses of commentaries.
His style is a blend of lucidity and grace and is compatible to its subject matter. His place in the annals of intellectualism would not be disputed even by the most ardent of his critics. The present edition of the book is sure to evoke a keen response in the readers, interested in Rumi's verses and mysticism.]

[Mathematicians, Astronomers and other scholars of Islamic Civilization and their works (7th – 19th Centuries) aims to provide bio-bibliographical information on mathematicians, astronomers, geographers and other scholars of Islamic civilization who lived in Asia, Africa and Europe between the 7th and 19th centuries. During this time, the countries that these scholars lived in were united by Islamic religion and civilization, with Arabic as the common language of science. The work is based on earlier publications and newly discovered sources and comprises the names of 1423 authors whose time of life is known and 288 authors whose time of life is unknown. It is hoped that this book will be the tool that will help researchers orient themselves with the vast amount of manuscripts and numerous works of reference in Arabic and other languages.]

[The mysterious sex life of the Ottoman society has remained a taboo until recent years. Even now it is not truly unveiled. Beyond the façade of conventional relations, the sexual life of the Ottoman society was surprisingly rich and colorful.

The Ottoman man was a conneassisieur of every kind of beauty. His addiction to all kinds of sexual experience was possible in the cosmopolitan context naturally, with a good deal of tolerance from the administrators in sexual matters.

On the other side of the coin, we find that the experiences enjoyed by the women were equally colourful. Here are some chapters from this wealth of experiences :

The Greatest Mystery : harem

Professional Sex in Ottoman Society

The Aesthetic Norms of the Ottoman Man

Encyclopaedia of Sexlong (Bahname)

Cengis and Lesbiens

Dancng Girls (Koceks)

[Women and Sexuality in Muslim societies brings together female researchers,
academics, activists, poets, journalists and cartoonists from different countries, who
illuminate various aspects of women's sexuality with analysis, research, literature
and personal accounts.
Their findings and experiences are as diverse as their lives and the societieis in which
they live, yet they are linked by their quest for integrity of the body, dignity and the
right to pleasure.]
