The consumption of coffee, or kopi in Indonesian, is so deep-rooted in the local culture that not even war could interfere. To most Indonesians, however, the phrase specialty coffee is still a foreign concept... also despite the fact that Indonesia is the fourth-largest coffee supplier to the global market. The times, however, are changing. A new generation of coffee entrepreneurs is emerging, inspired by the so-called third-wave coffee trend that swept the developed countries.

This book aims to capture the dramatic changes in Indonesia's coffee industry, while at the same time paying homage to centuries-old traditions in the way Indonesians farm and consume coffee. From the first chapter that summarizes the official history of how coffee first arrived in the Indonesian archipelago to chapters about Indonesia's contemporary coffee culture—its pioneers, early adopters, and enthusiasts—to the final chapter which attempts to bring a sense of reality into the growing enthusiasm for local coffees by highlighting some of the challenges that continue to haunt farmers, business owners, and consumers

Jamu is the herbal-medicine tradition of the Indonesian archipelago. Born from disparate influences brought by traders to this crossroads of Asian commerce, over the centuries jamu has developed into a sophisticated suite of nutritional supplements incorporated into cuisine, beauty rituals, and healing agents, all proven effective by empirical research. But jamu is more than brightly colored powders and tonics. Jamu Lifestyle is your gateway to entering a vibrant community devoted to self-care; a joyous and transformational world of wellness.

In the jamu tradition joy, community engagement, and beauty are considered essential to wellness. That means beauty rituals, community gatherings, and sensory engagement are all part of self-care and should be practiced regularly—not doled out occasionally as earned luxuries.

Srihadi Soedarsono's oeuvre can be construed as the continuation of a Javanese mystical endeavor that goes back as far as Borobudur's days. The painter Srihadi harnesses the symbolic language of the Borobudur and that of the wayang to create his own Borobudur- and wayang-inspired symbolic world. Yet, the way Srihadi fashions his symbols, in their form, color, and composition, and takes each of them, each time, to the very end of their possible expression – undoubtedly positions him as a master symbolist of international stature and an incomparable colorist. This book is the latest and the best Srihadi book ever—printed in chroma inks technology to represent his difficult to reproduce vivid colors.
