The Hmong mountains: Cultural spatiality of the Hmong in Northern Thailand / Maren Tomforde  
Berlin : LIT Verlag, c2006  
xvii, 478 p. : ill. and Maps.  
Includes Bibliography.  
3-8258-9313-8  
Southeast Asian Modernities – Volume 5  
\$ 69.50

[The concept of cultural spatiality includes all aspects of human agency, experiences and outside influences. As such, it encompasses socio-culturally enacted localities, whether these are real, imagined or only potential spheres of social, economic, religious, symbolic, or political action. As in the case of the Hmong in northern Thailand, people can be anchored via processes of place making in local settlements, in a diaspora spread over five continents or in the "Otherworld" of the supernatural agents. The concept of the Hmong Mountains signifies the "place" the Hmong people have constituted to maintain their socio-cultural distinctiveness despite statelessness. It is a mental model of the Hmong lifeworld which has evolved during the course of a long history of migration, dispersal and settlement in Thailand.

Maren Tomforde has researched on the Hmong in Thailand and is a Research fellow at the Bundeswehr Institute of Social sciences (SOWI).]

The Archaeology of the Mons of Dvaravati – 2 Volume (Vol 1- Text, Vol 2-Plates) / Pierre Dupont; Translated with Updates, additional figures and Plans by Joyanto K.Sen

Bangkok : White Lotus Co., Ltd, c2006

2v. : ill. ; 30 cm.

978-974-480-093-0

Vol.1. – Text; Vol.2.- Plates

\$ 100.00 (Set)

L'archéologie mone de Dvaravati by Pierre Dupont is a pioneering work on the architecture of the Mon Kingdom of Dvaravati and the evolution of the styles in the iconography of the statue of the Buddha. His analysis of the evolution of the styles in the Buddha's Iconography follows its development from India to Southeast Asia, identifies Indian prototypes for the Mon Buddha and relates it to the spread of Hinayana Buddhism.

This translation maintains the author's unique style and meticulous attention to details. Since this book was originally published in 1959, new discoveries and studies have added to our knowledge of the subjects. Extensive notes, references and discussions by other scholars on the new studies update the author's original thesis. This translation makes it convenient to follow the text and assists in recognizing evolving relationships in styles with additional appendices; annotated architectural plans, figures and plates; an expanded index; revised maps and a new set of recently taken photographs of statues and monuments.

[“This book provides an excellent basis for knowing and understanding Thailand. It has been carefully researched, and covers a full range of topics, starting with very practical information and branching out into more abstract social, historical and cultural issues. Much of its information would be hard to glean from other sources. The question-and-answer format, with answers ranging from four lines to four pages, is admirably designed to allow readers either to consult the book, guide-book style, in the course of activities, or to dip into idly while taking a siesta or lounging on a beach.”]

[Traditional Herbal Medicine in Northern Thailand is a pioneering work offering a comprehensive analysis of the herbal medical tradition in rural Northern Thailand. The focus of the research is the description and classification of local disease concept and the complex relationships between disease, plants, drugs, and prescriptions. The work is based on extensive communication with local practitioners, clinical observations and local manuscripts. About 540 medicinal plants are identified in the appendix, together with their claimed medical properties. In addition, the book

contains charters on the court medical tradition, and considers the prospects for the survival of traditional medicine in the face of competition from modern cosmopolitan medicine. The authors also provide extensive vocabularies, as well as indexes of disease terms and botanical names, including a Thai index of disease terms.

There is a wealth of information for those interested in medicine botany and ethnopharmacology, while the history and anthropological aspects of the work will interest many other students of Southeast Asia.]

[The Southeast Asian Press Alliance ( SEAPA), through its journalism Fellowship Program, seeks to change that. The exchange program allows mid-career journalists from the region to travel to a country outside their own to pursue in-depth stories. The experience not only deepens their awareness of what is happening in their neighborhood, but also heightens their empathy towards their neighbors. Across the Border: Southeast Asian Chronicles is a product of the journalists'travel around the region. It is an anthology of reports written by fellows of three successive programs beginning in 2002. The stories in this book present Southeast Asia as seen by Southeast Asians.]

[This new Edition of The King of Thailand in World Focus has been expanded, and completely redesigned and reformatted. It includes foreign coverage of the intervening years during which king Bhumibol become the world's longest reigning living monarch. The period had not been plain sailing by any means- the dramatic royal intervention in May 1992 to end political chaos and bloodshed is still dramatically etched on the world's collective imagination. The tense political standoff of 2006, when Thai politicians once again grappled with the fine print of constitutional democracy, ended in September with a bloodless military putach.]

[If Truth Be Told is a collection of short stories inspired by the author's experiences as a gay man in Thailand. Whether describing a jealous rivalry over a youth which gets a bit out of hand, a sex show with a difference or an extraordinary occurrence at a funeral, the stories, sometimes dark, sometimes humorous, are always thought-provoking in ways that go beyond the confines of much gay fiction.]

[Maoist People's War in Post-Vietnam Asia builds upon the earlier work of the author to provide a definitive exploration of the most effective means of irregular warfare yet devised. Comparing the Asian cases of Thailand, the Philippines, Sri Lanka, and Nepal-with Peru used as a prominent our-of-area Maoist standbearer-Dr. Thomas A Marks examines the strategy and operational art that make people's war such a devastating technique of armed politics, In the process, he sheds considerable light on insurgency and counter-insurgency in general, and offers much food for thought in the present battle against violent radical Islamists. For Mao's fundamental insight was to understand that insurgency was an armed political campaign that fielded violence, to include "guerrilla war" as but one of its weapons. His approach thus provides a template to analyze any insurgency or the Nepali state, all major post-Vietnam War cases of people's war had been unsuccessful. Recent difficulties of counter-insurgency efforts in Iraq and Afghanistan make these cases even more compelling for the lessons they offer.]

[The publication reports qualitative findings from a multi – Country study on the reproductive health of adolescent migrants. Conducted by distinguished organizations in China, Lao PDR, Thailand and Vietnam, it presents the plight of rural adolescent migrants as they live, labor and love in their new, more liberal urban settings, and how they mediate between their lives in the city and their prior, more conservative lives in their rural home communities.

Collectively, the studies reported herein reveal that the desire to escape poverty and to improve their lives and the lives of their families are paramount reasons for migration. Though they have left their rural homes, and some do not intend to return, the migrants are not alone. Social networks stretching from their rural communities into their new urban homes provide the adolescents with some protection against reproductive health risks.]

[Love in the land of Smiles is probably the most detailed and precise account of prostitution in Thailand to have been written in recent years. Reading it makes it plain that the information we have about the sex market in Asia is most of the time inaccurate or distorted by numerous Prejudices and miscomprehensions.

In this fascinating work, the authors, who have both been living in Thailand for some years, have contrived to distance themselves from the terms and tone of the customary polemical debate which the media have stirred up around this topic.]

Islamic discourse on sexuality and young Thai Mualims' interactions with modern  
urban Thai Culture. Focusing on Ramkhamhaeng, a Muslim community in Bangkok,  
the study vividly illustrates young Thai Muslims' struggles to reconcile their  
traditional religious beliefs with the surrounding manifestations of modernization,  
globalization, consumerism, changing sexual mores, and gay rights.]

[ 'Child Labour' and Child Prostitution in Thailand: Changing Realities explains why  
there has been a dramatic decline in Thai 'child labour' numbers. Today, the position  
of Thai children has never been better. Their lives differ greatly from their  
grandparents, and even older siblings. They are fewer, as a proportion of the total  
population, better educated, and far less likely to be working as child labourers or  
child prostitutes that at any other time. Changes to the lives of Thai children have  
taken place over generations, particularly since the late 1980s. At that time, the  
onset of an economic boom, combined with fertility declines, resulted in many  
children no longer working in the rice fields or factories, but in their main occupation:  
study. This change has and will continue to result in major benefit to Thai society.]
