[Vietnam has developed rapidly in the past decade. Economic growth rates of eight to nine percent were achieved and poverty reduced with over thirty percent. In particular, agricultural output increased tremendously, which reduced malnutrition and increased income of rural households. However, growth was not evenly spread over the country and rural urban gap widened. More effort is needed to reduce poverty and stimulate economic growth, particularly in rural areas. This book presents eight studies that give an overview of problems and opportunities encountered in developing the rural areas in Vietnam. The studies have been carried out by students from the Vietnamese-Netherlands masters programme in development economics.]

[Everyone know that under a monarchy, the king has the ultimate power, deciding everything. Yet in practice, the courtier also play a very great role in the management of the country. Sometimes we would be confused to say that this ruler holds important positions and is a conservative while the other person is a reformer. But history shows that they were all the same. Few would be able to bypass their time and generation. If an individual was to step ahead of others, his or her entire generation would try to prevent.]

Asian Socialism and Legal Change : The Dynamics of Vietnamese and Chinese Reform / John Gillespie
Australia : Asia Pacific Press at Australian National University, c2005
xiii, 340 p. ; 22 cm.
1 9209 4227 0
\$ 39.90

[The immense process of economic and social transformation currently underway in China and Vietnam is well known and extensively documented. However, less attention has been devoted to the process of Chinese and Vietnamese legal change which is nonetheless critical for the future politics, society and economy of these two countries.

In a unique comparative approach that brings together indigenous and international experts, Asian Socialism and Legal Change analyses recent developments in the legal sphere in China and Vietnam. This book presents the diversity and dynamism of this process in China and Vietnam – the impact of socialism, constitutionalism and Confucianism on legal development; responses to change among enterprises and educational and legal institutions; conflicts between change led centrally and locally; and international influences on, and interactions with, domestic legal institutions. Core socialist ideas continue to shape society, but have been adapted to local contexts and needs, in some areas more radically than in others. This book is the first systematic analysis of legal change in Asian transitional economies.]

[In this book, the author marshals evidence to support an arena-specific approach towards viewing Vietnam's state-society relations. In practice, the Vietnamese party-state's relations with society vary from the hard and uncompromising state, with the bureaucracy getting its way, to society's ability to negotiate the state's boundaries and regimes to make them less harsh. Any analysis of Vietnam's state-society relations needs to recognize and demonstrate both elements of dominance and accommodation, as well as specify the context in which either or both are seen. Alone, neither is adequate. In particular, the idea of the "state" needs to be disaggregated because "state" is not a singular actor that is coherent or uniform through time and space. To demonstrate how state-disaggregation can make our view more nuanced, this book analyses state-society interaction at the ward level of Hanoi, an urban local authority.]
