On the National and Colonial Questions : Selected Writings edited by Aijaz Ahmad

Marx & Engels reflections on India and China were crucial in Marx's later and more mature work, notably Capital, where colonialism is seen as a fundamental element in

the primary accumulation of capital within Europe. Similarly, the German experience made them deeply aware of the frequent counter revolutionary role of the bourgeoisie even in the national-democratic revolutions. "Their analyses of European nationalisms on the one hand, and of the colonial experience in Asia on the other, are usually seen as totally separate bodies of writing. This selection, put together by eminent Marxist scholar Aijaz Ahmad, is unique in that it tries to see all of that work as part of a single political and theoretical project
