Twentieth Century Impressions of Burma is part of a series on the British Empire that deals with the empire's history, people, commerce, industries, and resources. This publication is one of a now lengthy series, designed to give a literary survey of the various component parts of the British Empire and of leading countries in which British capital was extensively invested, or in which British political interests were centered. (Twentieth Century Impressions of Siam was also reprinted by White Lotus.) Burma at one time formed an integral part of Britain's Indian empire, but it was something more than an Indian province. Its geographical position, with a frontier that marches with the boundaries of the Chinese Empire and of French Indochina, a mighty waterway that gives access to the vast mountain regions of the great Asiatic range, and a coastline that stretches for 1,200 miles along the eastern side of the Bay of Bengal, is one of exceptional importance, and that importance increased as the inevitable development of the great continental railway system of Asia brought the ports of the Straits of Malacca into direct communication with India, and eventually through India with the countries of Europe. These prophetic words are more true today than hundred years ago. In this work, an attempt has been made to deal exhaustively with every phase of Burmese life. The history of the country is fully treated, and graphic pictures are presented by exceptional writers of the religious and social life of this, perhaps most fascinating people of Asia who owed allegiance to Britain. The administration, law, and finance of Burma are dealt with by experts; a full account is also given of the commerce, industries, and social aspects of everyday life, while clear and interesting descriptions are furnished of the principal population centers of the country. The book's illustrations, reproductions of hundreds of photographs, are exceptionally varied and interesting, particularly viewing them from a modern perspective.

The book takes as its centrepiece the life of a young Cambodian diplomat and his disappearance in 1977. Through that event and the 2009 trial of the Khmer Rouge security chief ultimately held responsible, it tells the story of a nation enslaved by one of the century's most brutal regimes, and shows how the damage done during those years remains undimmed.

A History of the Thai-Chinese brings to life the rich stories and legends of the Thai-Chinese. This community has had a tremendous impact on Siamese history and modern-day Thailand. Well beyond Bangkok's thriving Chinatown, the influence of Chinese immigration on the country has been profound. Many modern Thai leaders, including prime ministers, high-ranking officials and business leaders, are ethnic Chinese, and even the Thai royal family claims some Chinese lineage. Through interviews with descendants of prominent family members, research into family records, oral reports and other sources, A History of the Thai-Chinese relates how a people and a country embraced the opportunities afforded by the other

Burma's Spring documents the struggles of ordinary people made extraordinary by circumstance. Rosalind Russell, a British journalist who came to live in Burma with her family, witnessed a time of unprecedented change in a secretive country that had been locked under military dictatorship for half a century.

Her memoir carries the reader through a turbulent era of uprising, disaster and political awakening with a vivid retelling of her encounters as an undercover reporter.

Yangon Echoes welcomes readers behind the façades of heritage buildings to offer intimate views on life in the cosmopolitan city formerly known as Rangoon, Burma.

An unprecedented work of oral history, Yangon Echoes is a rich anthology of fascinating life stories exploring notions and values of heritage and home. This popular history of buildings charts social space and urban folklore, linking past to present via living memories.

The storytellers speak of joy and tragedy, simple pleasures and aching issues, candidly sharing their thoughts and feelings of living through Yangon's emergence from decades of stagnation to engagement with a rapidly spinning world. Told with courage and charm, these informal stories record everyday life through domestic connections to old places.

Trams of Bangkok, Eighty Years 1888-1968, is the first work tracing the history of trams in Bangkok, a pioneering work with Danish and Belgian involvement. Thailand was the second country in Southeast Asia with trams. First, horse-drawn trams appeared in 1888. But as horse-drawn trams were not very suitable in the tropics, they were replaced in 1893 by electric trams. (In that same year, the French attacked Siam in what became known as the Paknam Incident.) The resulting electric tram company, with its own generators, was one of the oldest in Southeast Asia. The Dutch introduced trams in Batavia (Jakarta) in 1869. Singapore followed in July 1905, after having experimented with electric tramways in 1891 and 1892. In 1893, Bangkok had a population of 250,000. The trams became quite popular with the people. The author made new drawings of all the tram lines. He has located the best information available on the electric tram cars, as the archives are poor. In the 1960s, trams became obsolete as buses took over. A renewal program of the rolling stock and new kinds of tram cars came too late. Buses were already duplicating the tram lines. The Thais liked to follow the American model, favoring road traffic over rail traffic. But now, realizing that this is not an ideal solution, Skytrain and subway lines are being built in Bangkok.

A brave British widow goes to Siam and—by dint of her principled and indomitable character—inspires that despotic nation to abolish slavery and absolute rule: this appealing legend first took shape after the Civil War when Anna Leonowens came to America from Bangkok and succeeded in becoming a celebrity author and lecturer. Three decades after her death, in the 1940s and 1950s, the story would be transformed into a powerful Western myth by Margaret Landon's best-selling book *Anna and the King of Siam* and Rodgers and Hammerstein's musical *The King and I*.

But who was Leonowens and why did her story take hold? Alfred Habegger, an award-winning biographer, draws on the archives of five continents and recent Thai-language scholarship to disclose the complex person behind the mask and the troubling facts behind the myth. He also ponders the curious fit between Leonowens's compelling fabrications and the New World's innocent dreams—in particular the dream that democracy can be spread through quick and easy interventions.

Exploring the full historic complexity of what it once meant to pass as white, *Masked* pays close attention to Leonowens's midlevel origins in British India, her education at a Bombay charity school for Eurasian children, her material and social milieu in Australia and Singapore, the stresses she endured in Bangkok as a working widow, the latent melancholy that often afflicted her, the problematic aspects of her self-invention, and the welcome she found in America, where a circle of elite New England abolitionists who knew nothing about Southeast Asia gave her their uncritical support. Her embellished story would again capture America's imagination as World War II ended and a newly interventionist United States looked toward Asia.

Twentieth Century Impressions of Burma is part of a series on the British Empire that deals with the empire's history, people, commerce, industries, and resources. This publication is one of a now lengthy series, designed to give a literary survey of the various component parts of the British Empire and of leading countries in which British capital was extensively invested, or in which British political interests were centered. (Twentieth Century Impressions of Siam was also reprinted by White Lotus.) Burma at one time formed an integral part of Britain's Indian empire, but it was something more than an Indian province. Its geographical position, with a frontier that marches with the boundaries of the Chinese Empire and of French Indochina, a mighty waterway that gives access to the vast mountain regions of the great Asiatic range, and a coastline that stretches for 1,200 miles along the eastern side of the Bay of Bengal, is one of exceptional importance, and that importance increased as the inevitable development of the great continental railway system of Asia brought the ports of the Straits of Malacca into direct communication with India, and eventually through India with the countries of Europe. These prophetic words are more true today than hundred years ago. In this work, an attempt has been made to deal exhaustively with every phase of Burmese life. The history of the country is fully treated, and graphic pictures are presented by exceptional writers of the religious and social life of this, perhaps most fascinating people of Asia who owed allegiance to Britain. The administration, law, and finance of Burma are dealt with by experts; a full account is also given of the commerce, industries, and social aspects of everyday life, while clear and interesting descriptions are furnished of the principal population centers of the country. The book's illustrations, reproductions of hundreds of photographs, are exceptionally varied and interesting, particularly viewing them from a modern perspective.

The book takes as its centrepiece the life of a young Cambodian diplomat and his disappearance in 1977. Through that event and the 2009 trial of the Khmer Rouge security chief ultimately held responsible, it tells the story of a nation enslaved by one of the century's most brutal regimes, and shows how the damage done during those years remains undimmed.

A History of the Thai-Chinese brings to life the rich stories and legends of the Thai-Chinese. This community has had a tremendous impact on Siamese history and modern-day Thailand. Well beyond Bangkok's thriving Chinatown, the influence of Chinese immigration on the country has been profound. Many modern Thai leaders, including prime ministers, high-ranking officials and business leaders, are ethnic Chinese, and even the Thai royal family claims some Chinese lineage. Through interviews with descendants of prominent family members, research into family records, oral reports and other sources, A History of the Thai-Chinese relates how a people and a country embraced the opportunities afforded by the other

Burma's Spring documents the struggles of ordinary people made extraordinary by circumstance. Rosalind Russell, a British journalist who came to live in Burma with her family, witnessed a time of unprecedented change in a secretive country that had been locked under military dictatorship for half a century.

Her memoir carries the reader through a turbulent era of uprising, disaster and political awakening with a vivid retelling of her encounters as an undercover reporter.

Yangon Echoes welcomes readers behind the façades of heritage buildings to offer intimate views on life in the cosmopolitan city formerly known as Rangoon, Burma.

An unprecedented work of oral history, Yangon Echoes is a rich anthology of fascinating life stories exploring notions and values of heritage and home. This popular history of buildings charts social space and urban folklore, linking past to present via living memories.

The storytellers speak of joy and tragedy, simple pleasures and aching issues, candidly sharing their thoughts and feelings of living through Yangon's emergence from decades of stagnation to engagement with a rapidly spinning world. Told with courage and charm, these informal stories record everyday life through domestic connections to old places.

Trams of Bangkok, Eighty Years 1888-1968, is the first work tracing the history of trams in Bangkok, a pioneering work with Danish and Belgian involvement. Thailand was the second country in Southeast Asia with trams. First, horse-drawn trams appeared in 1888. But as horse-drawn trams were not very suitable in the tropics, they were replaced in 1893 by electric trams. (In that same year, the French attacked Siam in what became known as the Paknam Incident.) The resulting electric tram company, with its own generators, was one of the oldest in Southeast Asia. The Dutch introduced trams in Batavia (Jakarta) in 1869. Singapore followed in July 1905, after having experimented with electric tramways in 1891 and 1892. In 1893, Bangkok had a population of 250,000. The trams became quite popular with the people. The author made new drawings of all the tram lines. He has located the best information available on the electric tram cars, as the archives are poor. In the 1960s, trams became obsolete as buses took over. A renewal program of the rolling stock and new kinds of tram cars came too late. Buses were already duplicating the tram lines. The Thais liked to follow the American model, favoring road traffic over rail traffic. But now, realizing that this is not an ideal solution, Skytrain and subway lines are being built in Bangkok.

Masked : The Life of Anna Leonowens, Schoolmistress at the Court of Siam /

A brave British widow goes to Siam and—by dint of her principled and indomitable character—inspires that despotic nation to abolish slavery and absolute rule: this appealing legend first took shape after the Civil War when Anna Leonowens came to America from Bangkok and succeeded in becoming a celebrity author and lecturer. Three decades after her death, in the 1940s and 1950s, the story would be transformed into a powerful Western myth by Margaret Landon's best-selling book *Anna and the King of Siam* and Rodgers and Hammerstein's musical *The King and I*.

But who was Leonowens and why did her story take hold? Alfred Habegger, an award-winning biographer, draws on the archives of five continents and recent Thai-language scholarship to disclose the complex person behind the mask and the troubling facts behind the myth. He also ponders the curious fit between Leonowens's compelling fabrications and the New World's innocent dreams—in particular the dream that democracy can be spread through quick and easy interventions.

Exploring the full historic complexity of what it once meant to pass as white, *Masked* pays close attention to Leonowens's midlevel origins in British India, her education at a Bombay charity school for Eurasian children, her material and social milieu in Australia and Singapore, the stresses she endured in Bangkok as a working widow, the latent melancholy that often afflicted her, the problematic aspects of her self-invention, and the welcome she found in America, where a circle of elite New England abolitionists who knew nothing about Southeast Asia gave her their uncritical support. Her embellished story would again capture America's imagination as World War II ended and a newly interventionist United States looked toward Asia.
