Global Economic Uncertainties and Southeast Asian Economies / Suthiphand Chirathivat, Chayodom Sabhasri, Aekapol Chongvilaivan, editors

Institute of Southeast Asian Studies, Singapore 2015

271p.  
9789814519366  
\$ 29.90 / PB  
450 gm.

The aftermath of the global economic breakdown in 2008-9 underscores the risks facing Southeast Asia's growth prospects. Although the region has demonstrated exceptional resilience to external shocks emanating from economic powerhouses around the globe, Southeast Asia is in dire need of an optimal policy mix of macroeconomic and trade policy measures that differ by country, underpin domestic demand, and revive domestic economies. This book offers in-depth, region-specific economic policy discourse that illuminates how a policy push is at work in the region, and sheds light on room for strengthening regional cooperation.

This book aims to: (1) discuss the developments of macroeconomic and trade-policy mix against the backdrop of the eurozone sovereign debt crisis and economic prospects for major countries in Southeast Asia (i.e., Singapore, Thailand, Malaysia, Indonesia, and Vietnam); (2) assess the effectiveness of policy responses to the global economic unrest; (3) identify opportunities and challenges facing Southeast Asia in the midst of the global economic slump when developing Southeast Asia leverages on an ever-expanding role in the global business environment; (4) rethink the East Asian model of growth where enormous gains were driven principally by export demands from advanced economies; and (5) pioneer the key areas of regional cooperation and macroeconomic and trade policy reforms that may potentially strengthen regional economies.

Living with Uncertainty: Social Change and the Vietnamese Family in the Rural Mekong Delta / Setsuko Shibuya

Institute of Southeast Asian Studies, Singapore 2015

256p.

9789814620291

\$ 29.90 / PB

400 gm.

This book is one of the first ethnographies written on the life of farmers in rural Southern Vietnam since the economic reform in the 1980s. It investigates how social, economic and political factors affect the farmers' life in the Mekong Delta in the late socialist era with a particularly focus on the family, which serves as the basic and most significant social unit for the farmers. Dealing with classical anthropological topics of kinship and family, the book examines them as dynamic institutions. With vivid illustrations of the village life, family farming, education of children, jobs outside of farming and everyday politics, it presents new and different pictures of the current Vietnamese family under rapid social changes.

The book will contribute to the current ethnographical research in Vietnam and Southeast Asia and also be of particular interest to those working on society and culture in the geographical region from broader disciplines. It will also appeal to readers who are interested in such topics as late socialism, social transformation, and rural development.

xv, 291p.  
Includes Index  
9789814596558

\$ 40.00 / HB

580 gm.

Reinventing Indonesia presents an insider's view of the tumultuous transition that took place in Indonesia from 1997 to 2004. This was a period of unprecedented changes in democratized governance and decentralizing power throughout the country amidst significant economic turmoil. The results of these changes were not pre-ordained, but were the result of the social forces unleashed by the Asian Financial Crisis and the end of the New Order as well as the deft guidance of key policymakers. The book also examines the origins of the economic crisis of the late 1990s in Indonesia and the actions taken to address the crisis during those difficult years.

The authors were directly involved in many of the events recounted in this book, particularly Ginandjar Kartasasmita through his career in the Indonesian government under various ministerial positions. Thus, the book provides insights that could only come from those directly involved in the decision-making. It also explains the transitions that occurred in Indonesia in the context of academic theories of democratic transition and consolidation, thereby adding to the body of knowledge in this area. The Indonesian story holds lessons, therefore, for the management of financial crisis, and for the urgency of reform and development of economic and political institutions.
