Meteorites: A Southern African Perspective / Ronnie McKenzie
Struik Publishers, South Africa 2014

120p.;

9781775840985

\$ 23.50 / HB

Meteorites are the remnants of meteors from outer space that have survived the corridor of fire through Earth's atmosphere and landed on our planet. Rare, and bearing secrets about the formation of our Universe, these 'treasures from space' have fascinated people ever since they were first identified in the late 18th century as extraterrestrial arrivals. This jam-packed book by enthusiast and collector Ronnie McKenzie introduces the topic in straightforward language and is richly illustrated with some 200 photographs and diagrams. It discusses how to identify meteorites, where they come from and where they have landed on Earth, the many different types, and how to set about collecting them. It also dispels some of the myths about these stones, and presents some infamous meteorite scams. A handy basic guide for those new to the topic, and for anyone interested in entering the field of meteorite collecting.

The Poacher's Moon / Richard Peirce

Struik Publishers, South Africa 2014

144p.;

9781775841784

\$ 26.75 / HB

When wildlife conservationist Richard Peirce learnt about the targeting of three private game reserves in the Western Cape in 2011 and the butchery of some of their rhinos, he embarked on a crusade to raise public awareness about the horrors of rhino poaching. This is the story of Higgins and Lady, two rhinos from the farm Fairy Glen that defied the odds by surviving a brutal attack. Peirce keeps the reader spellbound as he recounts the series of attacks and their aftermath in chilling detail: the unbearable savagery, suspect police work, shady characters, mysterious happenings and death threats. Reading like a crime thriller, this account of dogged survival, compassion and triumph – along with desperate strategizing to outwit the poaching mafia – will have wide appeal. Colour images throughout, taken as the drama unfolded, bring the subject even more vividly to life.
